PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 5+ years of experience designing, building, and scaling web applications across the MERN stack, TypeScript, and AI-driven automation. Proven track record leading cross-functional engineering teams, architecting microservices, and shipping high-performance products for Web3, fintech, and enterprise clients. Passionate about clean architecture, DevOps automation, and delivering measurable business impact.

CORE SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js (Hooks, Context API, Redux/Zustand), Next.js (SSR, SSG, API Routes), HTML5, CSS3/SCSS, Tailwind CSS, Bootstrap, Material UI, Responsive/Mobile-First Design

Backend: Node.js, Express.js, Laravel, Flask/Flask-RESTful, RESTful & GraphQL APIs, WebSockets, JWT/OAuth, Microservices Architecture, MVC/Blueprints, Middleware & Error Handling, Celery/Redis Background Tasks

Databases: MongoDB, MySQL, PostgreSQL, Redis

Web3 & AI Automation: Wallet Integration, Web3.js/Ethers.js, AI-Driven Workflow Automation, NLP-Based Chatbots

DevOps & Tools: Docker & Docker Compose, AWS, DigitalOcean, Vercel, Netlify, CI/CD Pipelines, API Rate Limiting & Caching, Git, Jira, Confluence

WORK EXPERIENCE

Full Stack Developer (Lead) — **Astra Protocol**, *Lahore, Pakistan*

September 2025 – Present

- Lead full-stack development across multiple **Web3 products**, including a KYC platform, on-chain data services, Fireblocks wallet integration, and a custom Astra wallet.
- Serve as **technical lead** across concurrent product lines, owning architecture decisions, code quality, and delivery timelines for a cross-functional engineering team.

Senior Full Stack Developer — **InterTech Global**, *Lahore, Pakistan*

June 2025 – September 2025

- Architected **AI-driven automation solutions** combining natural language processing (NLP), workflow automation, and chatbot systems for enterprise clients.
- Built scalable applications using **TypeScript, Node.js, React, and Express**, backed by robust, well-documented REST APIs.
- Designed **automation pipelines** that streamlined data workflows and reporting dashboards, reducing manual reporting effort.
- Configured cloud deployments and **CI/CD pipelines** to support high-availability production applications.

MERN Stack Developer — **JUSTCALL**

December 2023 – May 2025

- Built a full-featured CRM (voice, SMS, and email marketing) using MERN and AI automation, with **real-time chat, role-based authentication, and permissions management**.
- Delivered a **real estate marketplace platform** (a Zameen.com-style clone) with secure, role-based access control.
- Developed multiple full-stack applications end to end, including a **social media management platform**, from concept through deployment.

Frontend Developer (React) — **Appify Tech**, *Lahore, Pakistan*

August 2022 – November 2023

- Designed and built responsive medical application interfaces using **React, Redux, Tailwind, and Material UI**.
- Partnered directly with doctors and stakeholders to translate clinical workflows into scalable, reusable UI components.
- Used GitHub, Confluence, and Jira to manage sprint planning and cross-team project tracking.

Full Stack Developer (Laravel + React) — **Tech Consultants**

January 2022 – August 2022

- Designed and integrated RESTful APIs in Laravel with React front ends.
- Owned the project roadmap and agile ceremonies while coordinating a small development team.
- Managed end-to-end project delivery, from planning through deployment.

PERSONAL PROJECTS

Mahir *(April 2024 – October 2024)*

- Freelancer-booking platform connecting users with home-service professionals such as mechanics, plumbers, and electricians.

Smart Call Center

- Built a scalable AI-driven call center system using Node.js (Express), TypeScript, Twilio, and WebRTC on a **microservices architecture**, with dedicated services for authentication, AI-driven call handling, analytics, and gateway routing — supporting hundreds of concurrent users.

Digital Marketing Kit

- Built a scalable AI-driven digital marketing platform supporting email, SMS, and voice campaigns with analytics and lead management, using the **MERN stack** to handle hundreds of concurrent campaigns.

KEY ACHIEVEMENTS

- Reduced API response time by up to **40%** through code refactoring and caching strategies.
- Scaled applications to support hundreds of concurrent users using WebRTC, Twilio, and Socket.io for real-time communication.
- Implemented AI-driven workflows that automated customer support, cutting manual intervention by **30%**.
- Led end-to-end development of multi-module projects spanning CRM, POS, real estate, and social media platforms.

EDUCATION

Bachelor of Science in Computer Science

University of Rawalakot | September 2017 – September 2021 | CGPA 3.01

LANGUAGES

English — Full Professional Proficiency **Urdu** — Full Professional Proficiency
